| <i>If this is a variable unit course, the relationship between earned units and any difference in expected SLOs should be explained.</i> | | | |

Student Learning Outcomes:

1. Identify and understand the continuum from healthy (adaptive) grieving to unhealthy (maladaptive or psychologically disordered) grieving.
2. Achieve a basic foundation of the psychological reactions that may occur in response to loss and death.
3. Recognize and explain cultural and religious differences in the process of dealing with loss and bereavement
4. Acquire a basic understanding of the development of and the changes in the psychology of loss and death historically
5. Understand the theory behind and the real-life practical applications of the stages of grieving.
6. Appraise and apply one's own attitudes about his or her own death through the development of a hypothetical living will.
