

Mendocino College

Fundamentals of Geology for Real Estate

Before you buy, sell, lease, or build in Mendocino, Lake, or Humboldt Counties become familiar with the geologic risks and their potential impacts. This course is designed to provide home owners and real estate professionals with the knowledge to make informed decisions about the land they live on.

Topics to be covered include:

- Faults and Earthquakes
- Landslides and slope instability
- Mineral hazards
- Coastal and stream erosion
- Flood zones
- Water quality
- County Plans and Regulations

Mendocino County has its *Faults!*
