

ADDICTION AND RECOVERY COUNSELING ASSOCIATE OF SCIENCE

The Addiction and Recovery Counseling major addresses a wide range of issues in the field of addiction through its degree and certificate course work. Students vary from recent high school graduates to working professionals with advanced college degrees. Students are able to apply and integrate their academic learning through required practicum experiences in various public and private agencies, institutions and businesses. The Addiction and Recovery Counseling Program exceeds the minimal standards for Addiction Studies Programs established by the federal Substance Abuse and Mental Health Services Administration. These standards were identified by State of California legislation as meeting the educational requirements for counselor certification. Degree and certificate completers qualify to apply for certification through a variety of state-approved certification boards. Completion of the Associate of Science degree will assist students in obtaining entry-level employment, job promotion/salary increases or transfer to a four-year college or university. As with all programs, students who intend to transfer to a four-year institution should research the transfer institution's requirements.

Required Courses – Major:		Units
ARC 151	Alcohol and Drugs: Overview	3
ARC 153	Physiology and Pharmacology of Alcohol and Drugs	3
